

Westmount Minerals Starts Soil Sampling Program - Douay East Gold Project

Vancouver, British Columbia, May 25, 2022: Westmount Minerals Corp. ("**Westmount**" or the "**Company**") (CSE: **WMC**) is pleased to announce the start of the 2022 exploration field season on the Douay East Gold Project (the "Project"). A field crew consisting of geological and exploration technicians has been mobilized to the Project and has begun the collection of soil samples.

Westmount has planned a Soil Gas Hydrocarbon ("SGH") program over the Project which includes the collection and analysis of approximately 1,100 soil samples covering 3 separate targets on the property. The targets are structures and structural complexities inferred from the interpretation of a high resolution airborne magnetic survey completed in 2021 and which are assumed to be gold bearing based on historical drilling on the property as well as regional geological compilation. Up to four hundred samples will be collected in each of the target areas along 100-meter spaced grid lines. The target area grids range in size from approximately 1 to 2 square kilometers.

SGH is a deep penetrating geochemical exploration technique that has been researched, developed, and applied over the last 26 years in the exploration for sub-cropping mineral deposits ideally buried below one meter or greater depths of overburden. It is appropriately applied in the exploration of glacial till covered properties common in the Abitibi Greenstone Belt of Quebec and Ontario.

David Tafel, CEO and Director of Westmount commented: ***"We are very pleased to be commencing Westmount's initial ground exploration program on the Douay East Project. The Project is located in a long-established mining district that is currently experiencing record levels of exploration activity. The SGH survey is a relatively new but effective tool and another step in our exploration strategy of advancing the Project to the drill-ready stage."***

About the Douay East Property

The Douay East property covers an area of 4,868 Ha located in the Abitibi Greenstone Belt ("AGB"), western Québec. With over 100 years of mineral production, the AGB remains a very prolific gold mining district. The Douay East Property is located within the Casa Berardi Deformation Zone which hosts the currently producing Casa Berardi Gold Mine, past producing gold mines, and several active gold exploration projects. The Casa Berardi Gold Mine, located approximately 105 kilometres ("km") west of the Douay East property, has produced greater than 2 million ounces ("oz") Au, and has annual production of approximately 125,000 oz Au. The Douay East property is contiguous to the west with Maple Gold Mines Ltd's property that hosts the Douay Project which contains an estimated 422,000 oz Au of indicated resources and 2,352,000 oz Au of inferred resources. The Vezza Gold Project, located approximately 1.5 km from the northern boundary of the property, contains an estimated 327,000 oz Au in the measured and indicated categories and estimated inferred resources of 68,500 oz Au.

Forward-Looking Statements:

This news release includes certain forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian securities legislation. All statements, other than statements of historical fact, included herein including, without limitation, statements regarding the commencement of trading of the Company's common shares on the Canadian Securities Exchange, future capital expenditures, anticipated content, commencement, and cost of exploration programs in respect of the Company's projects and mineral properties, anticipated exploration program results from exploration activities, resources and/or reserves on the Company's projects and mineral properties, and the anticipated business plans and timing of future activities of the Company, are forward-looking statements. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Often, but not always, forward looking information can be identified by words such as "pro forma", "plans", "expects", "will", "may", "should", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes", "potential" or variations of such words including negative variations thereof, and phrases that refer to certain actions, events or results that may, could, would, might or will occur or be taken or achieved. In making the forward-looking statements in this news release, the Company has applied several material assumptions, including without limitation, that market fundamentals will result in sustained precious and base metals demand and prices, the receipt of any necessary permits, licenses and regulatory approvals in connection with the future exploration of the Company's properties, that the COVID-19 global pandemic will not affect the ability of the Company to conduct the exploration program on the Douay East Project, the availability of financing on suitable terms, and the Company's ability to comply with environmental, health and safety laws.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance, or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others, statements as to the anticipated business plans and timing of future activities of the Company, including the Company's option to acquire the Douay East Project, the proposed expenditures for exploration work thereon, the ability of the Company to obtain sufficient financing to fund its business activities and plans, delays in obtaining governmental and regulatory approvals (including of the Canadian Securities Exchange), permits or financing, changes in laws, regulations and policies affecting mining operations, risks relating to epidemics or pandemics such as COVID-19, including the impact of COVID-19 on the Company's business, financial condition and results of operations, the Company's limited operating history, currency fluctuations, title disputes or claims, environmental issues and liabilities, as well as those factors discussed under the heading "Risk Factors" in the Company's prospectus dated February 14, 2022, and other filings of the Company with the Canadian Securities Authorities, copies of which can be found under the Company's profile on the SEDAR website at www.sedar.com.

Readers are cautioned not to place undue reliance on forward-looking statements. The Company undertakes no obligation to update any of the forward-looking statements in this news release except as otherwise required by law.
